More While Loops

CMSC 104 Section 02
March 11, 2024

Administrative Notes

So, here's how Wednesday's quiz is going to work:

- It will become available to you at 5;30 pm
- Availability will end at 6:45 pm
- This is essentially a "take-home" quiz
    - You can come to the lab to take it
    - You can take it anyplace that's convenient
    - You CANNOT use ChatGPT or Google - answer the questions
- Do you really want to jeopardize your academic career over a 60 point quiz?

Quiz 2 - details

- 20 questions, True/False; Multiple Choice; and short answer
  - In some of the short answer questions you have to write a small section of C code
    - Write it on your own; no asking ChatGPT to write it for you
      - You know we're going to know exactly what ChatGPT spits out, right?
- There is a practice quiz on Blackboard with the same type and number of questions
  - I'll post a key probably tomorrow

The rest of the class

The rest of today's class will be spent working on Classwork 5 (due Wednesday night) and Classwork 6 (due the Monday after Spring Break)
