Very Basic C Programming

February 12, 2024

Administrative Notes

The first quiz is in class Wednesday

- On Blackboard
- We'll have a short "practice quiz" today to work out the bugs in the system
  - This practice quiz DOES NOT count toward your grade; it's just to get used to the system

A simple C program

```c
#include  <stdio.h>
    int main() {
     printf("Hello, World!\n");
     return 0;
    }
```

To run your program

While logged into gl.umbc.edu, in the same directory as your program:

`gcc hello_world.c -o hello_world.exe`

Then:

`  ./hello_world.exe`

Congratulations; you have just written and run your first C program!!
